

Harsh Saxena

☎ 7067557308 📍 Pune, Maharashtra ✉ hsaxena4321@gmail.com

Profile

- Dynamic software tester with over 4 years of experience in **web and mobile application testing**.
- Accomplished **software engineer** with a robust background in both Software as a Product (**SaaP**) and Software as a Service (**SaaS**) models.
- Extensive expertise in all phases of the Agile software development life cycle (**SDLC**) and software testing life cycle (**STLC**).
- Proficient in **automating test cases** and generating HTML reports using **Allure**.
- Skilled in functional and regression testing through both manual and automated testing tools, including **Selenium and Appium (Python)**.
- Comprehensive experience in unit, functional, regression, integration, and system testing.
- Proficient with tools such as **Charles, Metabase, Firebase, Moengage, Jenkins** (for build deployment and pipelines), and **Lens**.
- Expertise in **cross-browser testing** on Google Chrome, Safari, and Mozilla Firefox using **LambdaTest**.
- Implemented **JMeter** for load testing and **Postman** for API testing.

Professional Experience

Intellect

2023/05 – present | Gurugram, India

Software Tester

- Developed and executed automated test scripts using **Appium** for mobile applications and **Selenium** for web applications, enhancing testing efficiency and accuracy.
- Validated backend functionality and ensured data integrity through comprehensive API testing using **Postman**.
- Conducted thorough manual and automated testing to assess user interface, usability, and overall user experience, contributing to higher user satisfaction.
- Utilized **MySQL** to fetch and validate backend data, ensuring robust data verification.
- Actively participated in **Agile** ceremonies including sprint planning, daily stand-ups, and retrospectives, fostering team collaboration and continuous improvement.
- Documented test cases, results, and defects for effective tracking and reporting, enhancing transparency and accountability.
- Continuously improved testing processes and methodologies, driving enhanced efficiency and effectiveness.

Syfe

2022/03 – 2023/05 | Gurugram, India

Software tester

- Conducted end-to-end application testing on **iOS and Android** platforms, and **cross-browser testing** on web applications using **BrowserStack**, ensuring platform compatibility.
- Performed functional and regression testing using **Selenium with Python**, generating HTML reports with **Allure** for clear result visualization.
- Operated databases using **SQL queries** to modify scenarios for feature testing, ensuring comprehensive test coverage.
- Utilized **Charles** for monitoring and altering APIs during feature testing, enhancing API reliability.
- Contributed to load testing using **JMeter**, ensuring application performance under stress conditions.
- Tested **Google Analytics events** using **Firebase** and tracked events with **Moengage**, ensuring accurate event tracking.

Ubisoft

2020/03 – 2021/11 | Pune, India

Quality assurance engineer

- Tested product features on various platforms, ensuring consistent performance and user experience.
- Created detailed test cases and managed them on **TestRail**, ensuring organized and thorough testing processes.
- Followed the bug life cycle (**BLC**) and coordinated with developers to resolve bugs and implement necessary design changes, enhancing product quality.
- Utilized tools such as **X-ray, Telescope, Confluence**, and TestRail for comprehensive testing reporting, ensuring clarity and accountability.
- Conducted various types of testing including **smoke, ad-hoc, sanity, regression**, and interactive testing using **boundary value analysis**, ensuring thorough test coverage and reliability.

Education

Btech

2016/08 | Gwalior

Rajiv Gandhi Proudyogiki Vishwavidyalaya

Senior Secondary

2012 | Gwalior

Silver bells school

Higher secondary

2010 | Gwalior

St. Paul's school
